EXAMINER: Andrew R. Graham

FILING DATE: September 12, 2001

DOCKET: FA 04001/USA

TITLE: SMART PANEL FOR DECREASING NOISE IN WIDE BAND FREQUENCY

To: Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

June 16, 2004

AMENDMENT

In response to the Official Action mailed March 30, 2004, please amend the specification, claims and abstract of the application as shown in the attached pages.

REMARKS

The Section 112 issues have been dealt with by amending the specification and the claims to overcome each of the problems which the examiner pointed out. In addition, throughout the specification and claims, the term "resonant frequency of the board structure" has been replaced by "resonant frequency of the smart panel" because the object of the present invention is to prevent a noise propagation through the smart panel, not just through the board structure.
